Experiment 9: TechSavvy – Online Shopping System

1. Aim

To design and develop an interactive online shopping website named TechSavvy using HTML, CSS, and JavaScript, enabling customers to browse products, search and filter items, manage shopping carts and wishlists, place orders, and track order status. The website also allows administrators to add, modify, and remove products and manage customer orders.

2. Procedure

1. Create the basic webpage structure using HTML.
2. Design the website using CSS with a responsive layout, navigation bar, product cards, buttons, and forms.
3. Display product categories such as Smartphones, Laptops, Tablets, and Accessories on the home page.
4. Implement product search, category filtering, sorting, and product details.
5. Create customer registration, login, and profile management functions.
6. Implement shopping cart operations, including adding, editing quantities, and removing items.
7. Develop wishlist functionality and coupon discount options.
8. Create a checkout form to enter the delivery address and select a demo payment method.
9. Implement order history and order-status tracking.
10. Create an admin dashboard to add, edit, and delete products, update prices and descriptions, manage stock, and view customer information.
11. Use JavaScript and localStorage to store and manage the demonstration data.
12. Run the website in a browser and test all functionalities.

3. Code Snippet

HTML – Product display

```
<div class="product">
  <h3>Nova X Pro Smartphone</h3>
  <p>Price: ₹54,999</p>
  <button onclick="addToCart(1)">
    Add to Cart
  </button>
</div>
```

JavaScript – Add item to cart

```
function addToCart(id) {
    const product = products.find(p => p.id === id);

    if (!product || product.stock < 1) {
        alert("Product unavailable");
        return;
    }

    const item = cart.find(p => p.id === id);

    if (item) {
        item.qty++;
    } else {
        cart.push({ id: id, qty: 1 });
    }

    localStorage.setItem(
        "ts_cart",
        JSON.stringify(cart)
    );

    alert("Product added to cart");
}
```

4. Output

TechSavvy

5. Result

Thus, the TechSavvy online shopping system was successfully designed and implemented using HTML, CSS, and JavaScript. The website demonstrates the essential functionalities of an e-commerce platform, including product catalogue management, shopping cart operations, checkout, order tracking, and administrative control.
