Experiment 12: InsureEasy – Online Insurance Management Platform

1. Aim

To design and develop an interactive online insurance management website named InsureEasy using HTML, CSS, and JavaScript to simplify insurance policy comparison, customer management, policy applications, premium tracking, and renewal alerts for administrators, agents, and customers.

2. Procedure

1. Create the HTML structure for the InsureEasy website.
2. Design a user-friendly and responsive interface using CSS.
3. Develop registration and login forms for agents and customers.
4. Implement admin login functionality to approve or reject agent registrations.
5. Create policy categories for health, auto, and home insurance.
6. Develop a policy comparison tool to compare premiums, coverage, and features.
7. Allow agents to create and manage customer records.
8. Implement policy application and approval functionality.
9. Add a dashboard for customers to view policies and submit insurance claims.
10. Develop a premium budgeting calculator and due-date alert feature.
11. Store demo accounts, policies, customer records, claims, and alerts using browser local storage.
12. Test the website functionalities using a web browser.

3. Code Snippet

HTML – Insurance policy display

```
<div class="policycard">
  <div class="policyicon">  </div>
  <h3>Health Secure</h3>
  <p>Health coverage for individuals and families.</p>
  <div class="policyprice">
    ₹12,500 <small>/ year</small>
  </div>
  <button class="primary"
      onclick="applyPolicy('H01')">
    Apply Now
```

```
    </button>
</div>
JavaScript – Policy application
function applyPolicy(id) {
    const policy = policies.find(p => p.id === id);

    if (!activeUser) {
        openAuth("login");
        return;
    }

    if (activeUser.role !== "User") {
        toast("Switch to a customer account to apply");
        return;
    }

    userPolicies.push({
        id: "app" + Date.now(),
        policyId: id,
        policyName: policy.name,
        premium: policy.premium,
        owner: activeUser.email,
        ownerName: activeUser.name,
        status: "Pending"
    });

    saveAll();
    toast("Policy application submitted");
    switchRole("User");
}
```

4. Output

Protection that fits your life
Compare policies · Track coverage · Stay on top of renewals

5. Result

Thus, the InsureEasy online insurance management platform was successfully designed and implemented using HTML, CSS, and JavaScript. The system demonstrates insurance policy comparison, agent approval, customer record management, policy applications, claim submission, and premium reminder functionality.
