Experiment 18: AgriMart – Online Agricultural Shopping System

1. Aim

To design and develop an AgriMart online agricultural shopping system using HTML, CSS, and JavaScript. The system allows farmers to register, log in with OTP verification, manage agricultural products, search and purchase products, manage cart and wallet balance, place orders, and track order and shipping status.

2. Procedure

1. Create a project folder named AgriMart.
2. Create the files index.html, style.css, and script.js.
3. Design a responsive interface with product categories such as seeds, fertilizers, pesticides, farming equipment, and tools.
4. Implement farmer registration, login, and simulated OTP verification.
5. Display products with images, descriptions, prices, search, and category filters.
6. Implement add-to-cart, edit/delete cart items, and shipping address management.
7. Add wallet balance management and order placement.
8. Allow farmers to add, update, and delete products and view sales.
9. Implement order status and shipping status tracking.
10. Test the website in a browser.

3. Code

A. HTML (index.html)

```
<!DOCTYPE html>
<html lang="en">
<head>
 <meta charset="UTF-8">
 <meta name="viewport" content="width=device-width, initial-scale=1.0">
 <title>AgriMart - Agricultural Shopping</title>
 <link rel="stylesheet" href="style.css">
</head>
<body>
 <header>
  <h1>🌱 AgriMart</h1>
  <p>Your One-Stop Agricultural Shopping Store</p>
```

```
  <nav>
    <button onclick="showProducts()">Products</button>
    <button onclick="showCart()">My Cart</button>
    <button onclick="showOrders()">My Orders</button>
  </nav>
 </header>
 <main>
  <section class="search">
    <input id="searchBox" placeholder="Search agricultural products..."
          oninput="showProducts()">
    <select id="category" onchange="showProducts()">
      <option value="All">All Categories</option>
      <option value="Seeds">Seeds</option>
      <option value="Fertilizers">Fertilizers</option>
      <option value="Tools">Tools</option>
    </select>
  </section>
  <section id="content"></section>
 </main>
 <footer>
  <p>© 2026 AgriMart | Supporting Farmers</p>
 </footer>
 <script src="script.js"></script>
</body>
</html>
```

B. CSS (style.css)

```
body {
 margin: 0;
 font-family: Arial, sans-serif;
 background: #f3f8f0;
 color: #263b25;
```

```
}
header {
  background: #236b35;
  color: white;
  text-align: center;
  padding: 20px;
}
nav button, button {
  background: #e9a820;
  color: #172617;
  border: none;
  padding: 10px 16px;
  margin: 5px;
  border-radius: 5px;
  cursor: pointer;
}
main {
  max-width: 1000px;
  margin: auto;
  padding: 20px;
}
.search {
  display: flex;
  gap: 10px;
  margin-bottom: 20px;
}
input, select {
  padding: 10px;
  border: 1px solid #aaa;
  border-radius: 5px;
}
```

```
.product {
  display: inline-block;
  background: white;
  padding: 15px;
  margin: 10px;
  width: 220px;
  vertical-align: top;
  border-radius: 10px;
  box-shadow: 0 2px 7px #ccc;
}
.product img {
  width: 100%;
  height: 130px;
  object-fit: cover;
  border-radius: 5px;
}
footer {
  text-align: center;
  padding: 15px;
  background: #236b35;
  color: white;
}
```

C. JavaScript (script.js)

```
const products = [
  {
    id: 1,
    name: "Tomato Seeds",
    category: "Seeds",
    price: 120,
    image: "https://placehold.co/250x150?text=Tomato+Seeds"
```

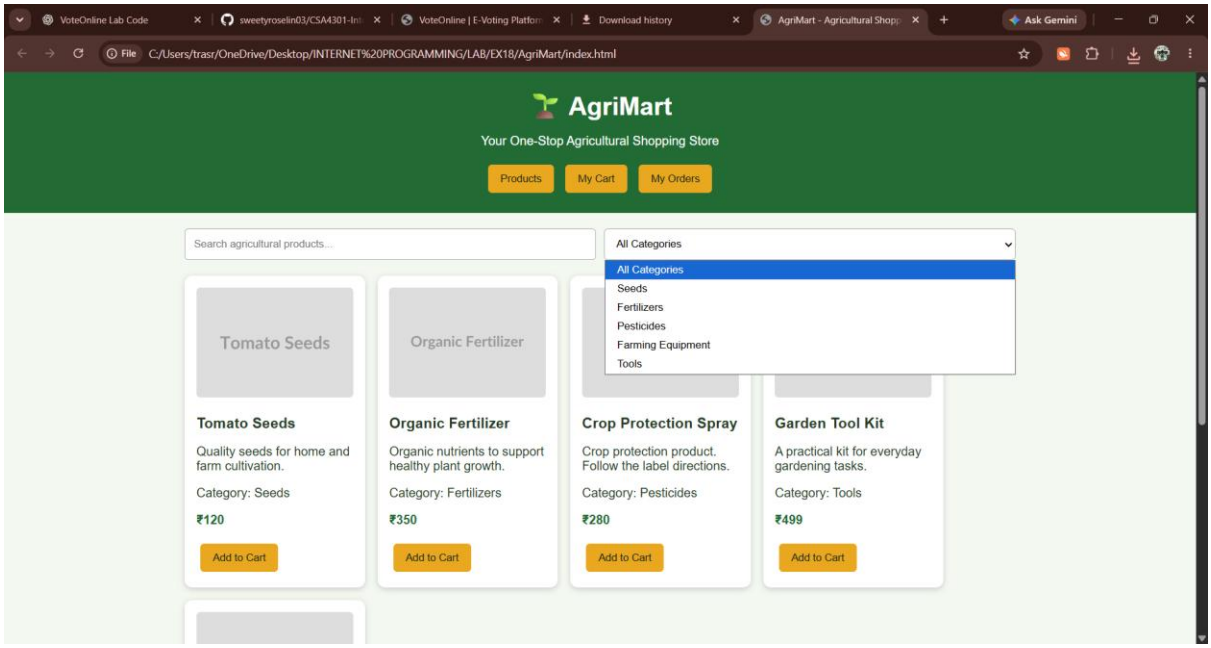

```
  },
  {
    id: 2,
    name: "Organic Fertilizer",
    category: "Fertilizers",
    price: 350,
    image: "https://placehold.co/250x150?text=Fertilizer"
  },
  {
    id: 3,
    name: "Garden Tool Kit",
    category: "Tools",
    price: 499,
    image: "https://placehold.co/250x150?text=Garden+Tools"
  }
];
let cart = JSON.parse(localStorage.getItem("agriCart")) || [];
let orders = JSON.parse(localStorage.getItem("agriOrders")) || [];
function showProducts() {
  const search = document.getElementById("searchBox")
    .value.toLowerCase();
  const category = document.getElementById("category").value;
  const filtered = products.filter(p =>
    p.name.toLowerCase().includes(search) &&
    (category === "All" || p.category === category)
  );
  document.getElementById("content").innerHTML =
    filtered.map(p => `
      <div class="product">
        <img src="${p.image}" alt="${p.name}">
        <h3>${p.name}</h3>
```

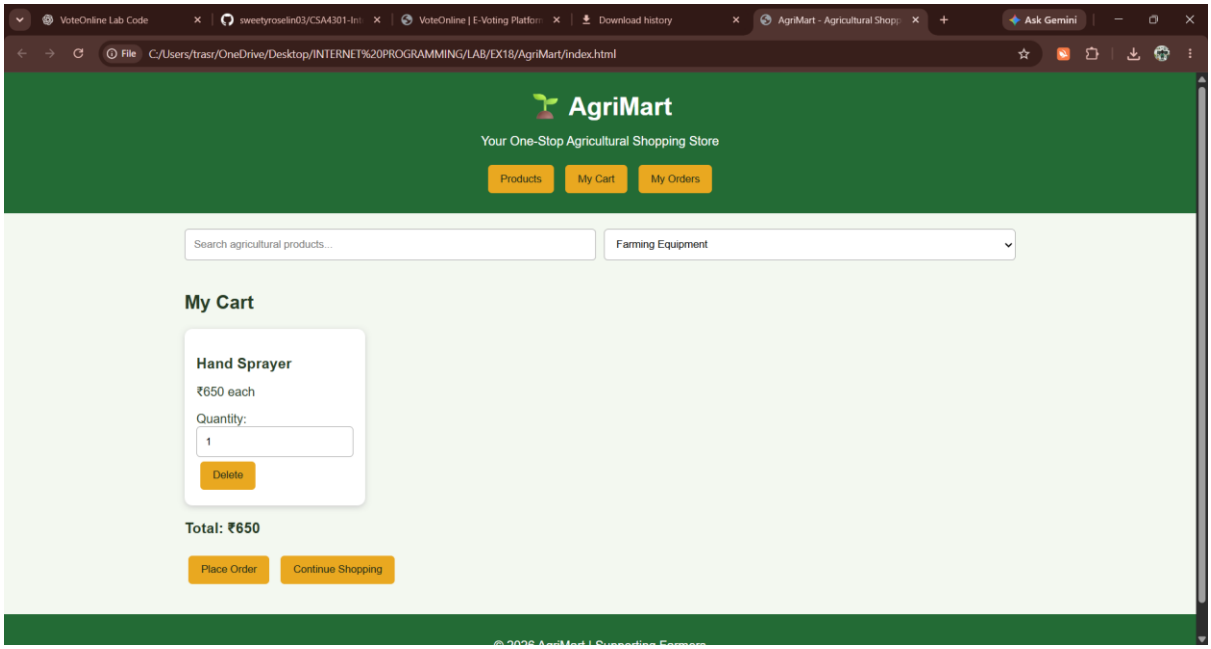

```
      <p>Category: ${p.category}</p>
      <p>Price: ₹${p.price}</p>
      <button onclick="addToCart(${p.id})">
        Add to Cart
      </button>
    </div>
  `).join("") || "<p>No products found.</p>";
}
function addToCart(id) {
  const product = products.find(p => p.id === id);
  const item = cart.find(p => p.id === id);
  if (item) {
    item.quantity++;
  } else {
    cart.push({ ...product, quantity: 1 });
  }
  localStorage.setItem("agriCart", JSON.stringify(cart));
  alert("Product added to cart!");
}
function showCart() {
  const content = document.getElementById("content");
  content.innerHTML = "<h2>My Cart</h2>" +
    cart.map(p => `
      <p>${p.name} - ₹${p.price} × ${p.quantity}
      <button onclick="removeItem(${p.id})">Delete</button></p>
    `).join("") +
    `<h3>Total: ₹${cart.reduce(
      (sum, p) => sum + p.price * p.quantity, 0
    )}</h3>
    <button onclick="placeOrder()">Place Order</button>`;
}
```

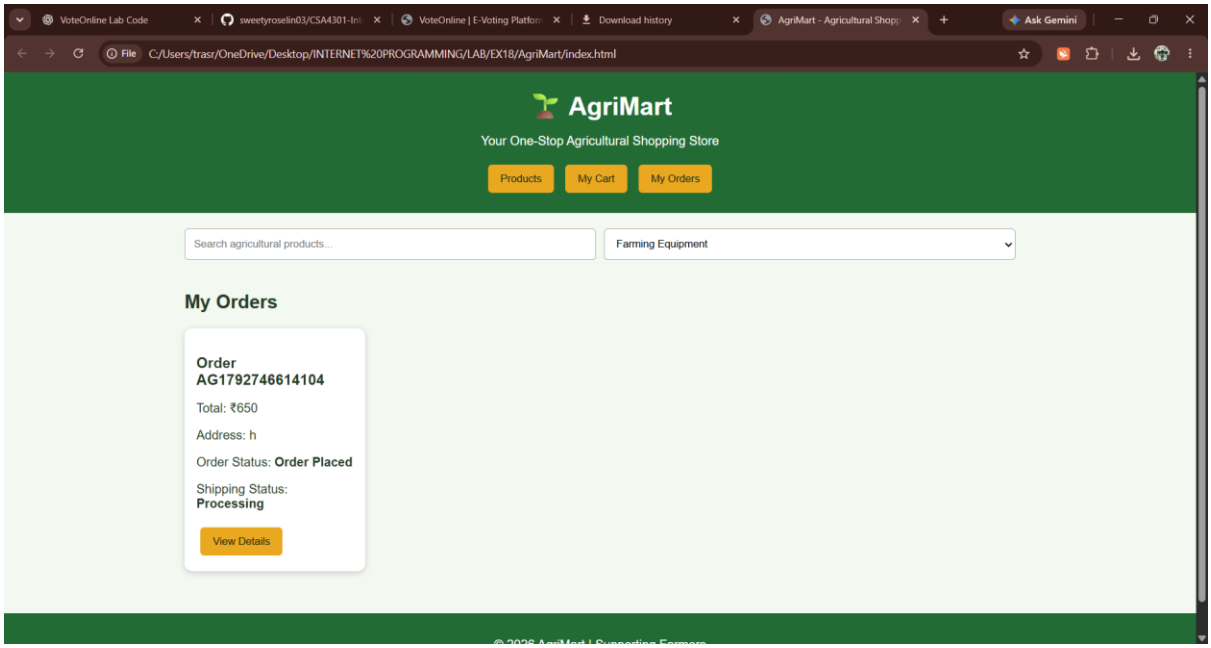

```
function removeItem(id) {
  cart = cart.filter(p => p.id !== id);
  localStorage.setItem("agriCart", JSON.stringify(cart));
  showCart();
}
function placeOrder() {
  if (cart.length === 0) {
    alert("Your cart is empty!");
    return;
  }
  const order = {
    id: Date.now(),
    items: [...cart],
    status: "Order Placed",
    shipping: "Processing"
  };
  orders.push(order);
  localStorage.setItem("agriOrders", JSON.stringify(orders));
  cart = [];
  localStorage.setItem("agriCart", JSON.stringify(cart));
  alert("Order placed successfully!");
  showOrders();
}
function showOrders() {
  document.getElementById("content").innerHTML =
    "<h2>My Orders</h2>" +
    orders.map(o => `
      <div class="product">
        <p>Order ID: ${o.id}</p>
        <p>Order Status: ${o.status}</p>
```

```
      <p>Shipping Status: ${o.shipping}</p>
    </div>
  `).join("") || "<p>No orders yet.</p>";
}
showProducts();
```

4. Sample Output

5. Result

Thus, the AgriMart online agricultural shopping system was designed using HTML, CSS, and JavaScript. The system demonstrates product browsing, searching, cart management, order placement, and order tracking, providing a convenient shopping experience for farmers and agricultural customers.
