Experiment 4: Online Train Reservation System

1. Aim

To design a simple Online Train Reservation System using HTML and CSS with train search, ticket booking, PNR status checking, ticket cancellation, and admin management options.

2. Procedure

1. Create an HTML file named train.html.
2. Design the webpage with HTML forms and CSS styling.
3. Add fields to search trains by source, destination, and journey date.
4. Provide options for passenger details, class selection, and ticket booking.
5. Add sections for PNR status, ticket cancellation, and admin management.
6. Open the file in a web browser to view the webpage.

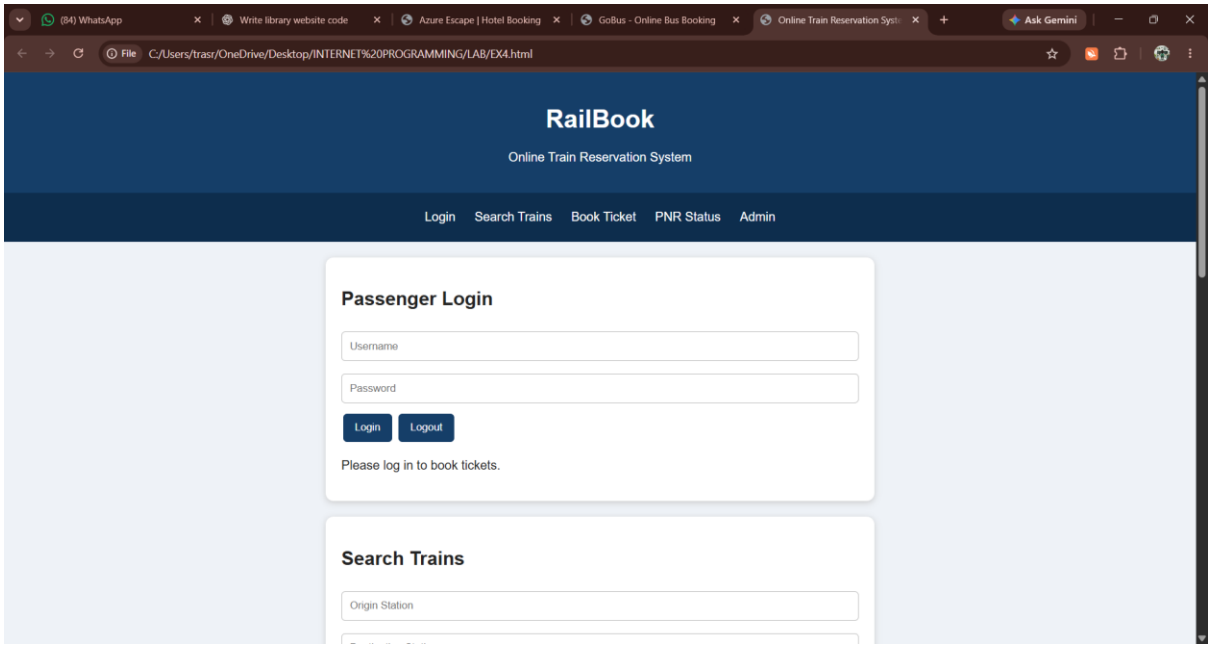

3. Simple Code Snippet

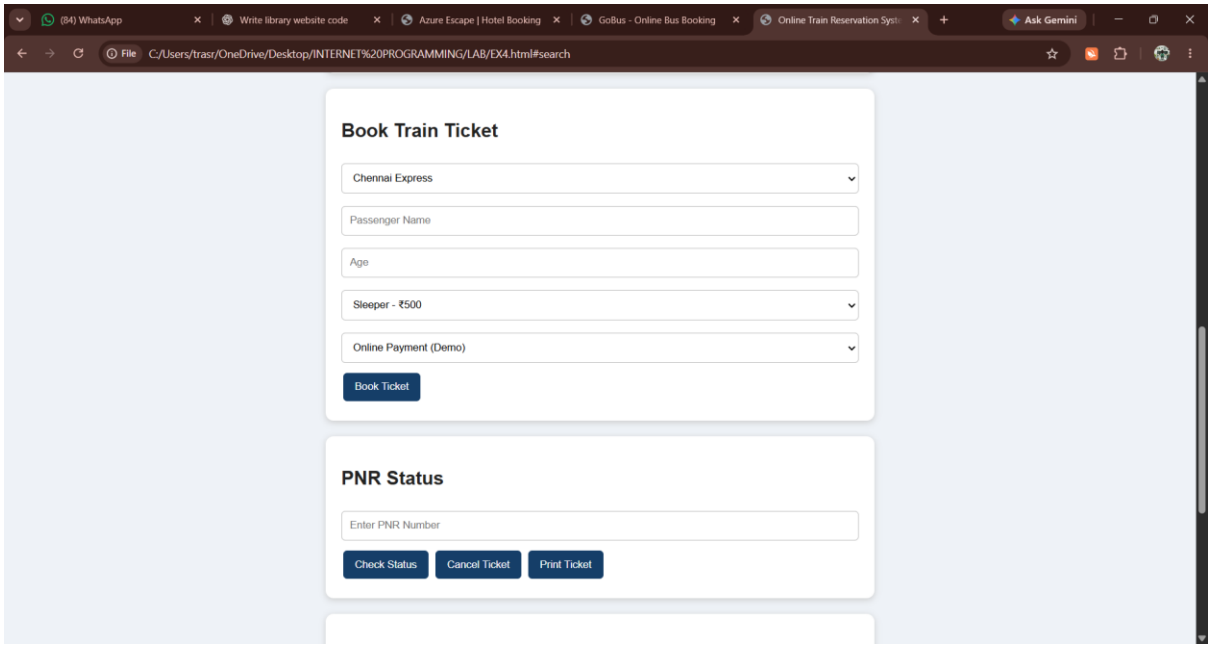

```
<!DOCTYPE html>
<html>
<head>
  <title>Train Reservation System</title>
  <style>
    body {
      font-family: Arial;
      background: #eef2f7;
      text-align: center;
    }
    h1 { background: #174477; color: white; padding: 15px; }
    .box {
      background: white;
      margin: 15px auto;
      padding: 15px;
      width: 300px;
      border-radius: 8px;
    }
    input, select, button {
```

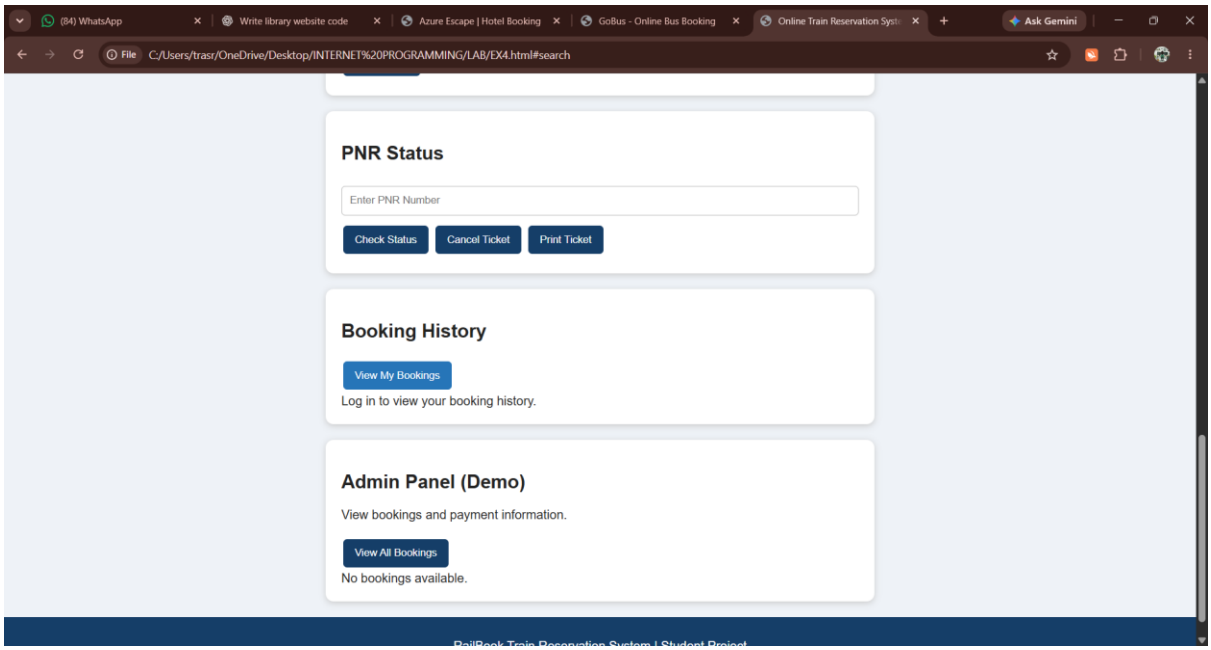

```
            margin: 7px;
            padding: 8px;
        }
        button {
            background: #174477;
            color: white;
            border: none;
        }
    </style>
</head>
<body>
<h1>Online Train Reservation</h1>
<div class="box">
    <h3>Search Train</h3>
    <input placeholder="Source Station">
    <input placeholder="Destination Station">
    <input type="date">
    <button>Search Trains</button>
</div>
<div class="box">
    <h3>Book Ticket</h3>
    <input placeholder="Passenger Name">
    <select>
        <option>Sleeper</option>
        <option>AC 3 Tier</option>
        <option>AC 2 Tier</option>
    </select>
    <button>Book Ticket</button>
</div>
<div class="box">
    <h3>PNR Status / Cancellation</h3>
```

```
    <input placeholder="Enter PNR Number">
    <button>Check Status</button>
    <button>Cancel Ticket</button>
</div>
<div class="box">
    <h3>Admin Panel</h3>
    <button>Manage Trains</button>
    <button>Manage Seats</button>
    <button>View Payments</button>
</div>
</body>
</html>
```

4. Output

5. Result

Thus, a basic Online Train Reservation System webpage was designed successfully using HTML and CSS.
