Experiment 6: Online Cake Ordering System

1. Aim

To design and develop an Online Cake Ordering System webpage using HTML and CSS that allows users to browse cakes, search and filter products, view cake descriptions, add cakes to cart, enter shipping details, and view order information.

2. Procedure

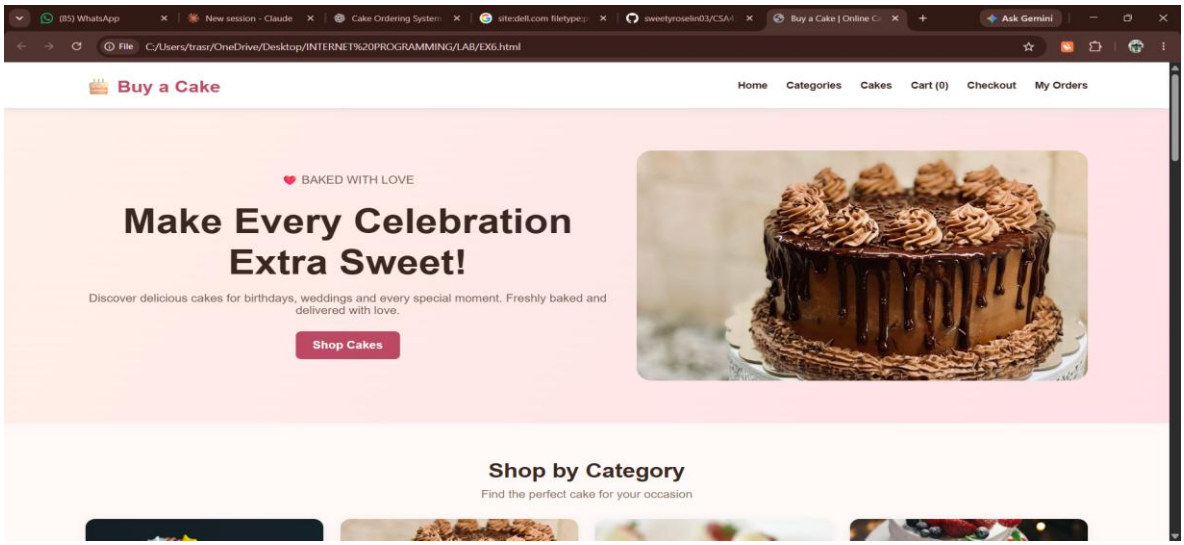

1. Create an HTML file named cake.html.
2. Design the webpage using HTML elements and CSS styling.
3. Add sections to display cake categories, images, prices, and descriptions.
4. Provide search and filter options to find cakes.
5. Create an Add to Cart feature and display the cart total.
6. Add a checkout form to enter customer and shipping details.
7. Include an order history section to display placed orders.
8. Open the HTML file in a web browser to view and test the webpage.

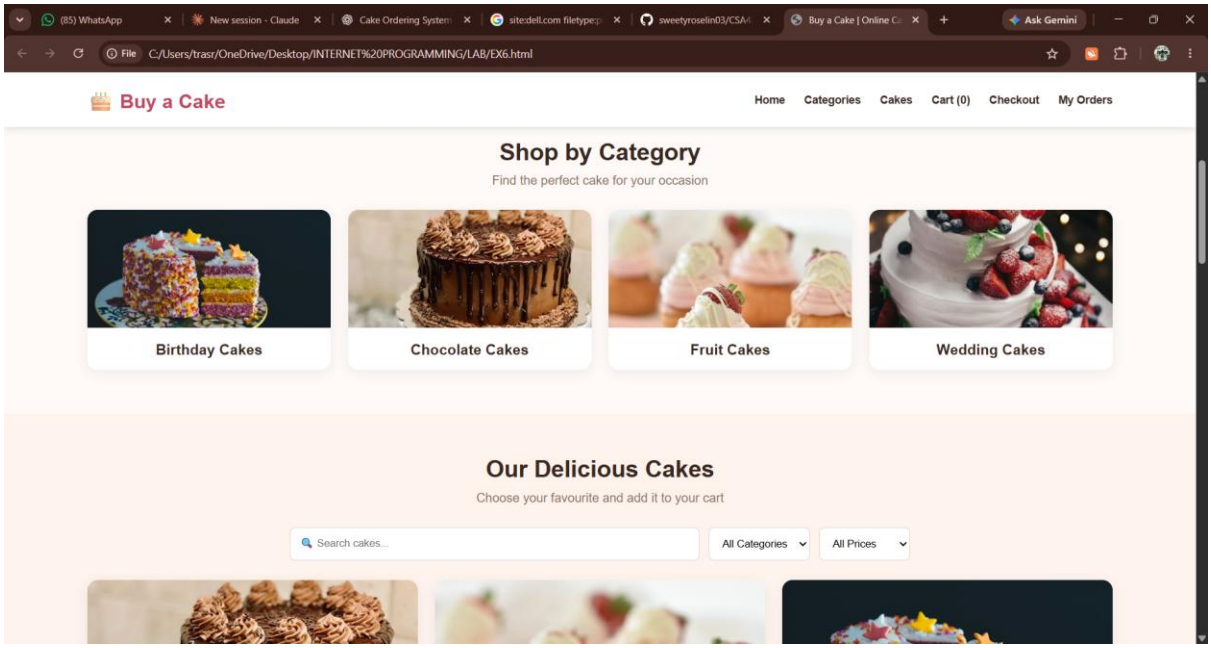

3. Code Snippet

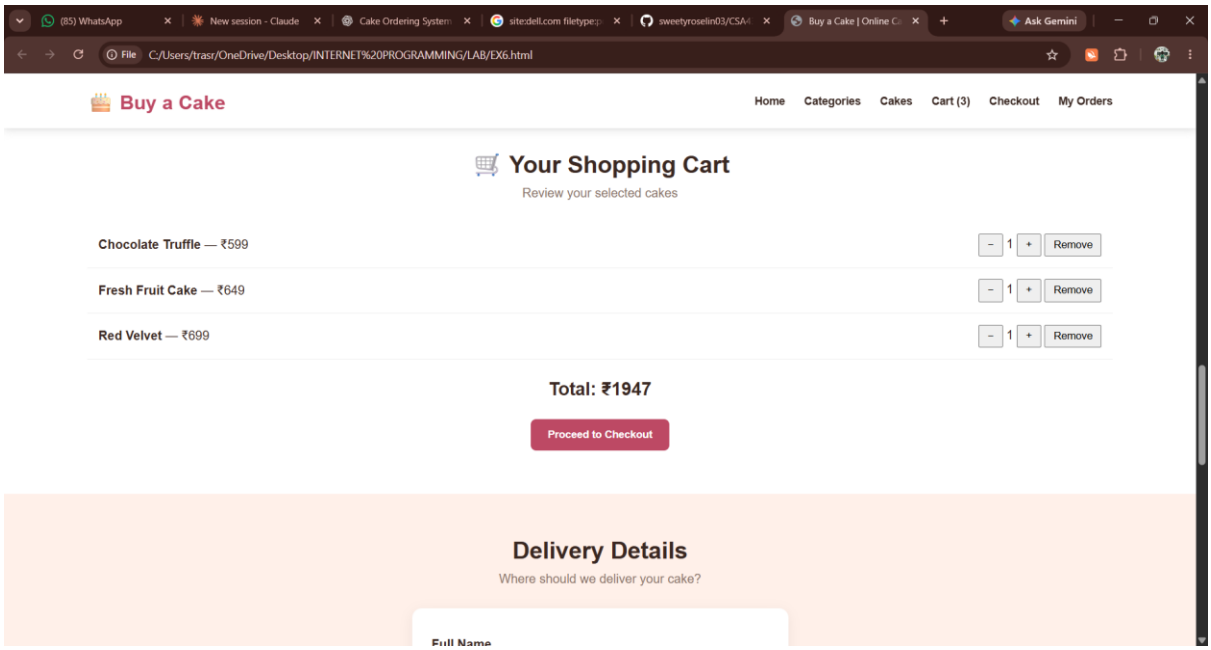

```
<!DOCTYPE html>
<html>
<head>
<title>Buy a Cake</title>
<style>
body{font-family:Arial;background:#fff0f3;text-align:center}
h1{background:#b83259;color:white;padding:15px}
.box{background:white;margin:15px auto;padding:15px;
width:280px;border-radius:10px}
img{width:200px;height:130px;object-fit:cover}
button{background:#b83259;color:white;padding:8px;border:0}
input{padding:8px;margin:5px}
</style>
</head>
<body>
<h1>Buy a Cake</h1>
```

```
<div class="box">
<h3>Chocolate Cake</h3>
<img src="https://images.unsplash.com/photo-1578985545062-69928b1d9587?w=400">
<p>Price: ₹599</p>
<button onclick="alert('Cake added to cart!')">Add to Cart</button>
</div>
<div class="box">
<h3>Birthday Cake</h3>
<img src="https://images.unsplash.com/photo-1464349095431-e9a21285b5f3?w=400">
<p>Price: ₹799</p>
<button onclick="alert('Cake added to cart!')">Add to Cart</button>
</div>
<div class="box">
<h3>Place Order</h3>
<input placeholder="Customer Name"><br>
<input placeholder="Shipping Address"><br>
<button onclick="alert('Order placed successfully!')">
Place Order</button>
</div>
</body>
</html>
```

4. Output

5. Result

Thus, the Online Cake Ordering System webpage was designed successfully using HTML, CSS, and basic JavaScript. The webpage provides cake browsing, searching, filtering, cart management, checkout form validation, and demo order tracking.
